Faazio - Fees, Seller Cuts & Payouts

A plain-English, fee-level view of how money moves. Live production rate cards read 30 October 2026. Amounts in ₹; rates in %. Product prices are intentionally excluded.

How to read this report

Three money flows are covered: (1) what the customer is charged at checkout, (2) what is cut off the seller's gross before payout, and (3) what Faazio pays riders.

Only fees and payouts are shown. GST is a pass-through tax already inside product prices, so it is never added as a separate customer line.

1. What the customer is charged

Customers pay no platform, service or convenience fee. Beyond the product price, the only additions are a distance-based delivery fee and any active surge. Self-pickup waives delivery.

Fee	Live rate	What it means
Delivery fee	₹35.00 first 3 km, then ₹7.00/km	Distance-based; self-pickup = ₹0
Night surge	₹20.00	Applies 11 PM - 3 AM; passed to the rider
Rain surge	₹25.00	Applies only when the zone is raining
Festival surge	₹15.00	Applies only inside an active festival window
Product GST (embedded)	5% of taxable value	Already inside the price; seller remits to Govt
Platform / service fee	0%	Does not exist - no such line is shown in the app
Free-delivery coupon	Up to the full delivery fee	Customer pays ₹0; Faazio funds the rider

2. What is cut off from the seller

Faazio takes no commission from sellers. Only two statutory amounts are withheld from gross: TCS 1.00% and TDS 0.10%. Together 1.10%, so the seller receives 98.90%.

Cut	Rate	Basis	Goes to
Platform commission	0%	-	Nobody (removed in code)
TCS	1.00%	Seller gross	Government
TDS	0.10%	Seller gross	Government
Total cut	1.10%	Seller gross	Government

The same rule in rupees - the exact amounts withheld at the settlement engine's rates:

Seller gross	TCS (1.00%)	TDS (0.10%)	Total cut	Seller receives (98.90%)
₹1,000.00	₹10.00	₹1.00	₹11.00	₹989.00
₹10,000.00	₹100.00	₹10.00	₹110.00	₹9,890.00
₹1,00,000.00	₹1,000.00	₹100.00	₹1,100.00	₹98,900.00

Platform fee % - stored per seller, NOT charged today

Range: 1% - 100%
Default: 10%
FOOD sellers: minimum 5%
Live seller (current): 10%
Why ignored: a deliberate product change (24 Oct 2026, 'seller-fee removal') so sellers keep full gross.
Charged today: 0% - engine ignores it; live ledger has 0 entries, so cut to date is ₹0.00.

3. Where Faazio makes revenue and where it spends

On a normal delivery Faazio keeps a small base margin. Distance beyond the base and all surges are passed straight to the rider, so they are not revenue.

Where we make revenue

- Delivery base margin: ₹5 per delivery.
- Customer base ₹35 minus rider base ₹30.
- Extra km and surges: ₹0 net (to rider).
- Commission: ₹0 - removed. Net ~ +₹5.00.

Where we spend (expense)

- Rider payout: ₹30 base + ₹7/km + surge.
- Free-delivery coupon: we fund the rider.
- FaazioCoin redemption: platform-funded.
- Seller payouts cost us nothing.

4. Which page decides or shows what

Rates are set once and applied everywhere; individual payouts are finalised on the payout boards.

Page	What happens there	Money effect
CUSTOMER APP		
Cart - 'Bag'	Reviews items; 'To Pay' = items + delivery - discount	Sets the expected total
Cart - Fulfillment + bill	Picks Delivery / Self Pickup; shows base + extra km + surge	Delivery fee, or ₹0; no tax row
Payment + receipt	Applies coupon / coins; confirms the paid amount	Coupon + coins cut the payable
WEB PORTAL		
Platform settings	TCS % and FaazioCoin earn / redeem rates	Commission removed
Sectors	Category master and the GST rate that applies	Governs pricing
Seller -> Payments	Gross | TCS | TDS | Product GST | Net payout	Seller net payout
Delivery -> Payouts board	Set AUTOMATED/MANUAL; record fare; Mark paid	Finalises the rider payout
Manual allocation + rate card	Pick mode at allocation; PUT /delivery/payout-settings	AUTOMATED/MANUAL; sets rates
DELIVERY APP		
Dashboard	Earnings & payouts, per active job	Job payout amount
Accept / Reject	Fare offered for the job before accepting	Job payout amount
Route	Running payout total for accepted stops	Job payout total
Payouts (Earnings)	Pending vs Paid + base + extra km + surge per job	Breakdown of each payout

5. Worked examples (fees only)

Scenario	Customer pays (delivery)	Rider receives	Faazio net
5.2 km, no surge	₹50.40	₹45.40	+₹5.00
5.2 km, night surge (₹20 both sides)	₹70.40	₹65.40	+₹5.00
8 km, rain surge (₹25 both sides)	₹95.00	₹90.00	+₹5.00
Self pickup	₹0.00 (waived)	No rider	₹0.00
Free-delivery coupon (5.2 km)	₹0.00 (coupon covers it)	₹45.40	-₹45.40

Live snapshot: 32 customer orders exist but their fee columns are all zero; 0 rider payouts, 0 seller ledger entries, 0 payouts and 0 tax invoices. The percentages above are the live production rules, not historical averages. The stored 'Platform fee %' (the one live seller = 10%) is ignored by the engine. The legacy flat ₹50 delivery fee is superseded by the dynamic card. Money is stored in paisa (1/100 rupee). All rates are admin-editable.
